

The frog is **shorter** than the lizard.

The caterpillar is **the same as** the butterfly.

The toucan is **longer** than the parrot.

$$14\text{cm} = 14\text{cm}$$

$$17\text{cm} < 17\text{m}$$

$$1\text{m} > 11\text{cm}$$

The bear is 2m tall.

The mouse is 10cm tall.

Tallest to shortest: **horse, cow, sheep.**

$$5\text{m} + 7\text{m} < 18\text{m} - 5\text{m}$$

$$22\text{m} + 7\text{m} = 23\text{m} + 6\text{m}$$

Children's answers will vary. Here is an example answer:

$$50\text{cm} + 15\text{cm} > 60\text{cm} + 6\text{cm}$$

$$25\text{m} + 10\text{m} = 15\text{m} + 20\text{m}$$

$$46\text{cm} + 9\text{cm} > 41\text{cm} + 3\text{cm}$$
