FASCINATING FACTS

Perseverance in the Natural World

Many birds show remarkable **perseverance** as they build their nests, piece by piece often in cold, wet and windy weather and at risk from predators.

The long-tailed tit is just one example. Weighing just 9g, this little bird takes 3 weeks or more to build a nest. The oval shaped nest is made from moss, cobwebs and hair, covered on the outside with lichen and lined with up to 2000 tiny feathers!
